

## ATA Recruitment: Effective Recruitment Solutions in the Pipeline

ATA Recruitment's Utilities, Infrastructure and Civils teams are specialists in sourcing white collar technical and engineering staff on both a permanent and contract basis. Having built a reputation for quality and efficiency across our client base, ATA can provide recruitment solutions covering upgrade and maintenance to the UK's water infrastructure.

### Our Capability

The depth and breadth of skills and resources within the group means ATA is well placed to offer bespoke recruitment solutions to water industry clients across the following areas:

- Design and Development
- Test & Inspection
- Maintenance
- Procurement
- Contract Management
- Installation
- Commissioning
- Project/Site Management
- Process

Upcoming priorities within the water sector present a new challenge for all of those involved, with a high level of innovation required to meet, not only aquatic environmental quality targets, but to balance these with carbon reduction plans and price limits that are at the front of Ofwat's agenda.

ATA has a part to play in taking on this challenge, in collaboration with our sister firm, contingent labour supplier Ganymede Solutions. We can source, prepare and deploy the personnel that will drive innovation and enable our clients to deliver a reliable, safe and efficient service to the water industry.

ATA is uniquely placed to offer clients a dedicated service from its 10 satellite locations:

- Glasgow
- Birmingham
- Leicester
- Derby
- Slough
- Enfield
- Newcastle
- Manchester
- Leeds
- Bristol

With over 35 years expertise, and with established relationships with clients throughout the utilities sector, our consultants find candidates with the best match to organisational objectives on an agreed timescale, allowing projects to be implemented on schedule.

As a dedicated water industry recruitment specialist ATA has extensive marketplace understanding, allowing us to place candidates with clients in a fast, highly efficient and mutually beneficial fashion.
