

## Frontline recruitment solutions for all your technical and engineering needs.

**For many Defence companies recruitment can prove a timely and complicated process in a highly competitive arena. Particularly when sourcing engineering and technical roles that require a niche level of expertise and personal attributes.**

ATA Defence has the skills and resources to source technical, engineering and other professional candidates who can support programmes in Land, Sea, Air and Joint environments.

Our highly skilled and experienced team have an established track record for success in this sector. Assisting with all levels of recruitment within the industry and utilising proven techniques, they identify active and passive job seekers that meet client needs.
