

SENIOR SOFTWARE & CONTROLS ENGINEERS

Tadcaster, Leeds.

**Circa £50,000
per annum**

**Fantastic
Benefits**

**Flexible Working
Arrangements**

Do you want to be involved in cutting edge design and development projects with first of its kind technology?

Are you looking to work on worthwhile and life changing products?

Would you like to work on clean energy and renewable projects?

WHY?

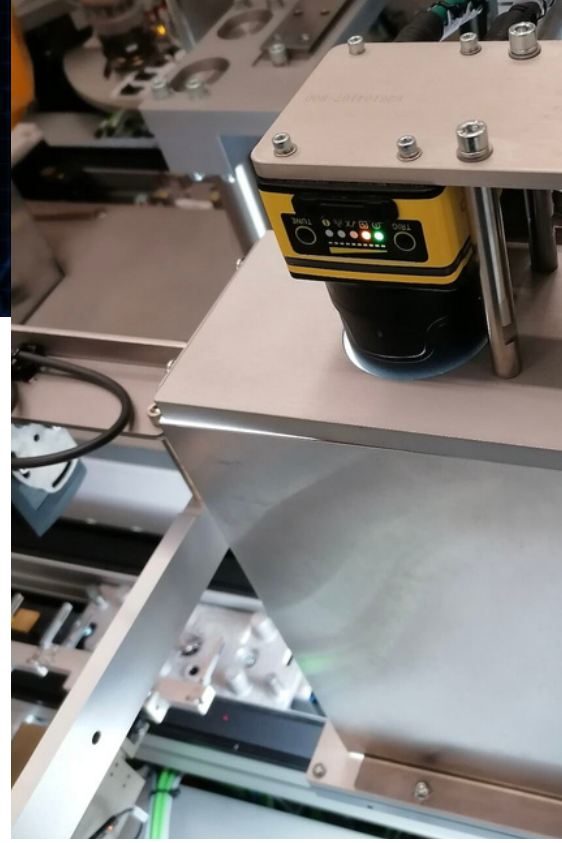

MPAC Lambert are working in partnership with ATA Recruitment to attract the best senior level software engineers who have the drive and determination to succeed and want exposure to brand new technology and processes. This is an organisation that designs bespoke systems, so if you're sick of knocking out the same boxes in different sizes, then this should be right up your street.

MPAC Lambert are working on bespoke engineering projects to manufacture energy cell technology, which means you will be constantly innovating, so you will get involved in influencing the controls engineering technical direction of the organisation. Your days will be filled with high level problem solving on first of its kind technology – bespoke software engineering!

In a company with massive ambitions (and over 107 years experience), you can get involved in exciting and complex controls and software projects.

It's crucial that the right people are brought into the business as it's a fantastic team and they're great at what they do. MPAC Lambert are growing at a rapid pace and can offer long term opportunities that you wouldn't get anywhere else.

YOU WILL NEED

- Background of leading the design of bespoke automation projects
- Background of software design, PLC programming using Siemens
- Worked with complex vision systems, robotics, servos, inverters, pneumatics etc.

THE ROLE

- Design new controls and software concepts for brand new clean energy projects
- Provide technical support to the team
- Using engineering knowledge to design bespoke complex products
- PLC programming using Siemens
- Working with customers to refine product
- Key part of project team to ensure fit for purpose solution
- Work with blue-chip clients to provide industry-leading expertise

THE REWARDS

- Circa £50,000 per annum and above

THE FUTURE

Joining MPAC Lambert at this exciting time will give you access to working with evolving technologies and you will be at the forefront of innovation. This business has an excellent track record of developing people through the business and, as a growing organisation, it will offer the chance to lead people and projects for the people that want the opportunity. You will have the chance to discuss progression at regular intervals due to their regular and inclusive review systems.

Interviews are happening immediately, so don't delay!
